

## **Director Corporate Analytics**

### **Start here**

If you're excited by the challenge of developing new and creative ideas for the use of data to support business decisions, we'd like you to join our management team as the permanent, full-time **Director Corporate Analytics** in **Regina**. In this role, you are responsible for managing the day-to-day delivery of centralized business analytic services for SGI and its regional operations. You will lead and coordinate corporate analytic projects and ensure the validity of research, analysis and findings. Working with various departments, including the Business Intelligence team, you will work to develop and improve analytics throughout the corporation. You will also be responsible to provide leadership and guidance to the Corporate Analytics staff.

To successfully perform the role, you will bring the knowledge & skills you have obtained from your bachelor's degree in mathematics, statistics or actuarial science. You will also bring the knowledge & skills obtained from your five years of experience with increasing responsibility in an analytical role. Previous management experience would be considered an asset. An alternative combination of relevant education and experience may also be considered.

### **Stay here**

SGI has been named one of Canada's Top 100 Employers for nine straight years. We provide competitive salary ranges with a wide range of employee benefits. With careers as diverse as our employees, join our supportive and inclusive culture with a great community of people.
