The Canadian Applied and Industrial Mathematics Society is a uniquely Canadian society aimed at representing the community of applied mathematicians working in academia, industry or government, or simply interested in the welfare of applied mathematics in this country. CAIMS provides cost-effective meetings in Canada, with a friendly and supportive atmosphere, where young trainees can feel a sense of belonging. It also allows more senior members opportunities for networking and for creating a society that is uniquely Canadian. Here are a few of the exciting activities that CAIMS members are working on today:

- *The Joint CAIMS-MITACS 2006 Annual Meeting, to be hosted at York University, June 15-20, 2006.*
- *The Cecil Graham Doctoral Dissertation Award and the CAIMS Research Prize, to be awarded in June 2006 at the York Meeting.*
- *The 2007 CAIMS Annual Meeting, to be held at the spectacularly beautiful Banff Conference Centre, May 20-24, 2007.*
- *The International Council for Industrial and Applied Mathematics has awarded the 2011 ICIAM Congress to Canada. CAIMS members worked hard to win this bid. CAIMS will cohost ICIAM 2011 in Vancouver, with our partners SIAM and MITACS.*

For more information about CAIMS activities and membership, please go to the CAIMS website: <http://www.caims.ca/>

If you are not yet a member of CAIMS, we would like to invite you to join. Joining CAIMS takes only a few minutes and is not expensive. By becoming a member, faculty at any Canadian university can also extend complimentary memberships to their students. Moreover, for a limited time, CAIMS offers a one year complimentary membership to any new faculty member at a Canadian university.
