

Department of Mathematics and Statistics

Capilano University

The department of Mathematics and Statistics in the Faculty of Arts and Science at Capilano University invites applications for a regular, full time Instructor position. This appointment is a permanent ongoing position subject to a probationary period of two years. The start date is August 1st, 2019.

A PhD is recommended in either mathematics or statistics. Applicants should have a strong commitment to teaching at the undergraduate level and have excellent communication skills. A typical workload would consist of teaching six courses per year as well as spending time assisting students in our math learning centre, but this could vary depending on the needs of the department. Duties would also include a variety of service and administrative work across the university, particularly in the area of program and course development. Preference will be given to candidates with areas of expertise in statistics and data science.

Interested individuals should apply via PeopleAdmin:

<https://jobs-capilanou.peopleadmin.com/postings/1667>. Applicants will need to provide a cover letter, CV and contact information for at least three references. Applications must be received no later than February 18th to be considered.

Diversity and inclusivity are an integral part of Capilano University's campus community. Our multicultural student body, faculty and employees enrich our learning environment and experience. CapU is committed to attracting and retaining a respectful and diverse workforce. Human rights, diversity, inclusion and equity underpin our employment practices and policies. We are proud to be an equity employer and encourage applications from women, persons with disabilities, visible minorities, Indigenous peoples, people of all sexual orientations, gender identities and expressions, and all other grounds included under the B.C. Human Rights Code.
